THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. The planned output of bauxite for 1952 from the MASZOBAL (Russo-Hungarian Aluminum) combine mines is one million tons, which will yield 250,000 tons of finished aluminum.
2. 90% of this planned figure is expected to be reached.
3. The planned figures for the individual mines are:

	<u>Bauxite Production</u> (approximately)	<u>Destination of</u> <u>Finished Product</u>
Gánt	400,000 tons	Home market
Izaskaszentgyörgy	400,000 tons	Czechoslovakia
Nyirád	150,000 tons	U.S.S.R.
Halimba	50,000 tons	U.S.S.R.

4. Fresh deposits of bauxite are still being found. Recently during the construction of a railway embankment for a factory line leading from Halimba, the grabs turned up a hitherto unknown layer lying just below the surface.
